

Relay Buddy User Guide

1. Open Relay Buddy by clicking on the icon.
2. From the Main Screen you can navigate to all portions of the app at any time.
 1. Using Relay Buddy
 1. Step 1 – Click Set Up Race
 1. Enter the information requested. The information can be left blank. Runner names may be first name or first and last name. Either combination will work.
 2. Click Submit to be returned to the Main Screen
 2. Step 2 – Review the information entered if you like by clicking Meet Information. Inspect your entries. You may go back and update the entries at anytime. You may return to the home screen by clicking Back.
 3. Step 3 – Click on Race Timer
 1. Click Start to begin the race.
 2. When the first runner gets to the end of their leg, click the Split 1 button. The split will be taken and displayed at the top of the screen.
 3. For each subsequent runner, click their Split button to record their time.
 4. When Split 4 is tapped, the race will end. The total relay time and all splits will be displayed. Also, you will be offered the ability to do the following:
 1. View Final Results – Displays all Meet Information along with time and splits. Also gives the ability to send the results in Text or Email.
 2. Reset Time – Will reset the total relay time and all splits. However, it will leave the names and other meet information intact.
 3. Clear All – Will reset time and clear all names and meet information. Do not Clear All until you have sent your results by Text or Email. There is no save function within the app.
